## Managing and Supervising Work in Confined Spaces

The management of confined spaces course is for those who want to manage work which takes place in and around confined spaces, where training is needed to effectively carry out the task to regulation standards.

Taking place at the dedicated training facility with state-of-the-art equipment in Stockton on Tees or London, the 6150-61 course will allow delegates to learn in the best environment possible and comes with a certificate qualification for those passing the course successfully.

This course can also be carried out at your premises.

This qualification will be valid for a period of three years.

### Who is the Course Suitable For?

Managers and Supervisors have a duty of care to ensure that any spaces within their control are adequately monitored and maintained.

Managers and supervisors must often define and be aware of the risks and requirements when it comes to confined spaces as laid out in the confined space regulations 1997.

As confined spaces can be dangerous and many fatalities have taken place in certain environments, training in the management of these spaces is essential

The 6150-61 course is most suited to anyone who would like to work in the management of confined spaces and their teams and needs training to be able to successfully do the job.

### Did You Know?

There are water versions of most of the Confined Space training courses.

## Managing and Supervising Work in Confined Spaces

### What is Covered in the Course?

As part of the course delegates can expect to learn how to develop safe working methods, identify risks and assess the requirements for manpower and safety of their teams and working environment.

### Delegates will be taught the following learning modules:

- What is a confined space
- Overview - Confined Space Regulations 1997
- Legal Responsibilities
- Applying relevant legislation and industry requirements
- Carrying out risk assessments
- Identifying control measures for work activities in confined spaces
- Developing safe working methods
- Establishing effective procedures for permits to work
- Developing emergency arrangements
- Implementation and maintenance of effective document storage and auditing
- Procedures for reporting systems and risk assessments

### What Assessments Are There?

Assessed through a practical and written test.

### Are There Any Entry Requirements?

There are no formal entry requirements except a desire to learn and an interest in the subject.

### What Are The Reading Requirements?

All candidates are encouraged to make themselves familiar with regulations and legislation relating to confined spaces prior to studying this course.

### Final Thought
