

Confined Space Entry Escape Set Breathing Apparatus

A full entry confined space training course, candidates will be instructed and trained to safely enter, exit and work with confined spaces while using breathing apparatus.

Escape set breathing equipment will be provided as part of this course; candidates are expected to bring their own safety footwear, waterproof clothing, hard hat and working gloves for practical exercises.

Who is the Course Suitable For?

This course is suitable for those who will be entering confined spaces and require the use of breathing apparatus in order to do so.

It is suitable for all industries, including water, utilities, construction, industrial and chemical applications.

Due to the physically demanding nature of this course candidates must be deemed medically suited for the course by a medical practitioner.

What is Covered in the Course?

The course covers the following modules:

- Outcomes of the Confined Spaces Regulations 1997,
- Personal protection and hygiene requirements,
- Risk assessing residual hazards,
- Types of gaseous atmosphere, portable gas monitoring and its use,
- The use of harnesses, tripods/man-riding winches, fall arrests and safety lines,
- The use of escape breathing apparatus as part of a self rescue procedure,
- Safe entry, working and exit procedures in confined spaces,
- Emergency procedures and practical exercises,
- Knowledge and skill assessment exercises for planning, entering, working and exiting confined spaces using escape breathing apparatus as a part of the planned means for self rescue.
